MOHIT PANDEY

Python/Django Developer

📞 +91 70887 92002 | ✉ mp7698921@gmail.com | 📍 Bageshwar, Uttarakhand 🔗 [GitHub](#) | 🔗 [LinkedIn](#) | 🌐 [Portfolio](#)

Professional Summary:

Python/Django Developer with hands-on experience in developing scalable web applications and RESTful APIs using Django, PostgreSQL, and JavaScript. Skilled in developing secure, database-driven applications with RESTful APIs and third-party integrations. Strong understanding of backend development, OOP principles, and version control (Git).

Work Experience:

IT Operations Associate (Incident Management)

Wipro Ltd. | **May 2024 – Present**

- Resolved incidents with minimal service disruption, achieving a 10% reduction in SLA breaches.
- Analyzed SLA reports daily to proactively identify risks and ensure compliance.
- Managed full incident lifecycle—logging, categorization, impact assessment, and resolution—within SLA targets.
- Partnered with L2/L3 support and development teams to troubleshoot and resolve recurring issues.
- Developed a strong foundation in ITSM principles and started upskilling in backend/frontend technologies through personal projects and certifications.

Python Developer Intern

CodSoft | Dec 2024 – Jan 2025

- Developed 2+ desktop applications using Python and Tkinter, including a Quiz App and a Contact Book App.
- Implemented CRUD functionality, improving data management efficiency by 40%.
- Designed an optimized UI/UX, reducing user navigation time by 25%.

Technical Skills:

- **Languages:** Python, JavaScript
- **Web Development:** Django, Django REST Framework, HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, React
- **Databases:** PostgreSQL, SQLite, SQL
- **Version Control & Collaboration:** Git, GitHub
- **API Development:** RESTful APIs, JSON, Token Authentication (JWT)

Projects:

ReDealX.com – Second-Hand Marketplace

Tech Stack: Django, Django REST Framework, PostgreSQL, HTML, CSS, Bootstrap, JavaScript
🔗 GitHub: [Link](#) | 🌐 Demo: [Link](#)

- Developed and deployed a full-stack marketplace featuring 500+ product listings, reducing product search time by 30%.
- Integrated Google OAuth for secure, one-click user authentication, streamlining the onboarding process.
- Implemented real-time search and filtering functionality using optimized queries, boosting product discovery speed by 40%.
- Built in-app call and messaging features to enable seamless, direct buyer-seller communication.
- Leveraged Django Signals to trigger real-time notifications for actions like new listings, logins, reports, and messages.

iCourses Website – Full-Stack Course Selling App

Tech Stack: Django, PostgreSQL, Razorpay, HTML, CSS, Bootstrap, JavaScript

🔗 GitHub: [Link](#) | 🌐 Demo: [Link](#)

- Developed and deployed a scalable course-selling platform using Django and PostgreSQL, optimizing performance with Django ORM for efficient database interactions.
- Integrated Razorpay with webhook handling for secure, real-time payment processing and accurate transaction status tracking.
- Implemented JWT-based user authentication with email verification to ensure secure user registration and login.
- Built a referral discount system that boosted user engagement by 20%.

My Shopping Cart – E-commerce Website

Tech Stack: Django, SQLite, Paytm Integration, HTML, CSS, Bootstrap, JavaScript

🔗 GitHub: [Link](#)

- Built a full-featured e-commerce platform, handling secure transactions with Paytm integration.
- Developed an order tracking system, enabling real-time updates on product deliveries.
- Implemented Django signals for automated order status updates, reducing manual intervention by 50%.
- Optimized database performance, reducing query load times by 35%.

Education:

- **Diploma in Computer Science & Engineering**
  Government Polytechnic Kotdwar | Completed: June 2023 | 86%

- **12th Grade – PCM**
  Government Inter College, Tuper | Completed: April 2019 | 73%
